

## **Green Zone & Green Pavilion**

The Green Zone, centrally located in the Leasing Mall in the South Hall S1, will feature many exhibits that showcase how the industry is embracing environmentally friendly practices.

The Green Pavilion, also prominently located in the South Hall next to the Green Zone, is an educational exhibit that presents new trends in sustainable building design relating to environmentally friendly stores and shopping centers. See examples of the tactics being employed by stores and shopping centers to promote safe and healthy buildings that also aid in sustaining the quality of life we enjoy for future generations.

Experts at education sessions will speak about new low-cost green ideas that result in operating savings with a quick payback, the latest in building design concepts relating to new and renovated construction in sustainable sites, new technology to minimize potable water usage and encourage water reuse, how to use renewable energy, methods for conserving resources, recycling and promoting the use of regionally available products, improving indoor air quality, using natural light and other ways to ensure healthy conditions inside buildings.
