

Certified Development, Design and Construction Professional (CDP)

CDP/CSM/CMD/CLS e-Practice Tests

Who Should Apply

Individuals who have been actively engaged in the development, design and/or construction of shopping centers for at least five years, preferably in one of the following professions: architect, engineer, general contractor/construction manager, facilities manager, retail store planning, retail construction manager. These individuals may represent an independent contractor, a retail organization or a property owner.

How You Will Benefit

- Receive an industry designation that recognizes your experience, knowledge, and skills.
- Be recognized for your leadership capabilities and increased professional stature.
- Gain and keep your competitive edge.
- Experience the difference between just knowing your field and being a leader in your field.
- Have your achievement announced to local media outlets through ICSC news releases.

Qualifications

In order to qualify for the designation of CDP, you must:

- Be or have been active in a position directly responsible for development, design and/or construction of shopping centers as an owner representative, development manager, project manager or tenant coordinator, architect, engineer, general contractor, construction manager, facilities manager, retail store planner or retail construction manager.
- Have at least five years* of active full time experience in shopping center development, design and/or construction.
- * Applicants may substitute for the fifth year of experience completion of the ICSC Development, Design and Construction Institute or the University of Shopping Centers School of Development, Design and Construction.
- Pursue a mandatory program of continuing education, after achieving the CDP designation, in order to maintain the CDP designation.

The time period will be calculated up to the application deadline date. Employment dates will be verified.

CDP Examination

The CDP Examination is a written examination consisting of 100 items administered in a three-and-one-half hour session.

Examination Schedule

Certified Development Design and Construction Professional (CDP)

June 20-27, 2009

Deadline: May 26, 2009

October 17-24, 2009

Deadline: September 11, 2009

Location: Prometric Testing Centers worldwide.

How to Apply

The CDP Application and Applicant Handbook is available on ICSC's Web site, www.icsc.org – go to **Education & Careers**, view the **Education** menu and click on **Certification Programs**.

Fee for the CDP examination:

Member: \$495 (U.S.)

Non-Member: \$990 (U.S.)

The **e-Practice Tests** were developed to give potential accreditation candidates an instant opportunity to learn how the exam questions are structured, as well as to highlight the candidates' strengths and weaknesses in the subject matter. The goal is to assist candidates in their planning and preparation for the lengthier exam. The items in the e-Practice Tests have appeared on previous examinations and reflect a sampling of content and difficulty levels a candidate would find on actual exams.

For each professional designation, the **e-Practice Test** contains 15 items, which are available in two modes. In the exam mode, after completing all 15 items, you will be instructed as to how many items you answered correctly and will receive feedback as to whether you answered the question correctly or incorrectly, with an explanation of the correct answer.

The study mode provides immediate feedback as to whether you answered the question correctly or incorrectly, with an explanation of the correct answer once each item is completed. Each **e-Practice Test** candidate has access to his designated **e-Practice Test** for 24 hours, which begins from the moment of the initial log-on time to the service. Free to ICSC members.

How to Register

Register on-line at www.icsc.org – go to the education and career menu, and click on education, then **e-Practice Test**.
