Preparing a Pro Forma Leasing Plan

The leasing plan is a vital component to the overall business plan of a center or groups of centers. It sets the stage for tasks that need to be done to lease the center, bring revenue, allocate capital expenses for tenant improvement allowances, and assign responsibilities that assure due dates are met. Special emphasis will be placed on preparing the budget of leasing activity, CPI increases, and how to treat vacant rooms, expirations and step-rent.

9:00 – 10:30 am

The Next 25 Years: Preparing for the Future of Retail and Mixed-Use

This session tracks the seismic shift in consumer behavior and its effects on retail and mixed-use development. We'll review where retail real estate has been the last 25 years, recent changes with the onset of e-commerce, and how Millennials and members of Generation Y are changing the way they shop, live, work and recreate. This session will explore the details of these changes, and provide valuable tools to recognize what this shift could mean for the future of retail and mixed-use development.

Online to Offline: Digitally Native Brands and Their Expansion Into Brick-and-Mortar

The number of new brands launching online is ever increasing. At the same time, digitally native retailers are realizing the need to open physical stores that complement their online presence. Since 2012, the number of new stores being opened by digitally native vertical brands (DNVB) has grown in excess of 100% annually, showing that the future of retail is truly omni-channel. Attendees will learn how to engage with DNVBs that are building out physical storefronts, how to best tailor their centers to accommodate their needs, and how to formulate the best leasing structures for brands that are new to brick-and-mortar.

Lean Operations and Strategies for Increased NOI and Profitability

Net Operating Income is probably the most crucial bottom-line figure every type of shopping center monitors. This course will explore the concept of producing additional income with less expense from the most common sense ideas to more complex strategic applications. This session is designed to integrate practical ideas, real-life experiences, and best practices. Attendees will learn how to map out a game plan to improve operational efficiencies; creative strategies to generate additional income; cost-saving ideas to minimize operational expenses; how to get the most value of every dollar spent on products and services; energy-efficient improvements that lower tenant CAM charges and improve NOI; methods to generate short-term revenue from expected and unexpected vacancies; and when to outsource services for maximum efficiency.

2:00 – 3:30 pm

Connecting the Disconnect: Creating Trusted Partnerships

Centers are not landlords; they are retail channels, accounting for 90% of U.S. retail trade. Retailers are not tenants; they are brands, seeking to maximize sales to their customers, regardless of channels. How can the two entities forge a stronger, mutually beneficial partnership? This session focuses on the current and evolving uses of Big Data toolsets in the industry, from geo-fencing through in-center data capture, push notifications and consumer dynamics. Discussion and case study findings will be used to show where we are and where we are headed in areas such as AI (Artificial Intelligence), AR (Augmented Reality), NVP (Natural Voice Processing), and more.

The panelists will also shed light on what it will take to create a true omni-channel environment and how shared data will drive repositioning, remerchandising and re-marketing strategies for the next generation of retail real estate.

2:00 – 3:30 pm

Retail site selection is as much of a science as it is an art form. The more you understand the process and how retailers think, the more successful your deals will be. Leasing agents, retailers, developers, and economic directors will all gain valuable insight from this course. Taught by a leading retail real estate advisor, this class will explore which locations will work well and which will not; what causes a retailer to select one site over another, what elements successful retailers look for when making their decisions; how to efficiently use demographics, zip code analysis, visibility, access and traffic flow; comparative analysis and sales forecasting; applying profitability models and pro formas; and how to analyze socioeconomic trends, fashion statements and psychographics.

ongoing tenant coordination activities. Attendees will be able to distinguish differences in tenant coordination management strategies for new properties versus open and operating ones; strategically plan and implement a program tailored to specific corporate or client needs; identify significant new industry trends and their impact on retail; and how to use tenant coordination programs to successfully compete in a competitive marketplace.
